

Murray History Advisory Board
Minutes for December 23,2009
Emergency Meeting

Attendance: Jay Bollwinkel, Lee Brinton, Kathy Romero, Susan Wright, Doug Stone (realtor)
Mary Ann Kirk (staff)

A demolition request was reviewed for 4771-4773 S State. This area was removed from the DHOD but these buildings still remain in the National Registry District which is on our local register. Mary Ann said there was some confusion about which buildings were actually to be demolished. The building at 4775 S State had the most historical significance and was originally designated as significant in the DHOD boundaries. It is listed as a B site on the RLS survey but could qualify as an A when its history is considered. The realtor explained the buildings to be demolished are the two north buildings of a complex of four buildings. Board members looked at photos and the history was reviewed for each. The two buildings have been stuccoed to appear as one building. Because of the modifications, Mary Ann clarified that these buildings were non-contributing buildings in the national register district so technically they didn't need to be reviewed. She indicated the board will review all the buildings in the National Register District in this area next month to make sure they are accurately designated.

The realtor will provide additional photos of the exterior before demolition. We have fairly good historical background of this complex of buildings because an ILS survey was completed for the building at 4775 S State which included historic photos of the area. No other documentation was needed.
